

Frost protection agent - Glysofor Solar AF

Heat transfer and frost protection agent (up to -28 degrees Celsius) for flat plate collectors and vacuum tube solar plants, pre-ready to be filled in.

Environmentally friendly and toxicologically harmless concentrate based on monopropylene glycol.

Heat transfer, antifreeze and corrosion protection agent.

Optimised in terms of environmental compatibility, material compatibility and biodegradability.

Also suitable for mixing systems (multi-metal installations).

Comprehensively corrosion inhibited for long-lasting, low-maintenance operation.

Free of nitrites, phosphates, amines, borates and silicates.

Biodegradable.

Water pollution class: WGK 1

Frost protection value - Glysofor Solar AF:

Frost protection in ° Celsius	
<i>Glysofor Solar AF</i>	<i>Antifreeze protection</i>
100%	-28

Safety temperature: _____

Min. concentration: _____

Total quantity of the solution: _____

Required amount of concentrate: _____

Product/Type: Glysofor Solar AF
