

Frost protection agent - Glysofor TERRA

Environmentally friendly concentrate based on monoethylene glycol.
Special product for use in geothermal probes in connection with brine/water heating pumps.
Heat transfer, antifreeze and corrosion protection agent.
Optimised in terms of environmental compatibility, material compatibility and biodegradability.
Also suitable for mixing systems (multi-metal installations).
Comprehensively corrosion inhibited for long-lasting, low-maintenance operation.
Free of nitrites, phosphates, amines, borates and silicates.
Biodegradable.
Water pollution class: WGK 1

Frost protection value - Glysofor TERRA:

Frost protection in ° Celsius	
<i>Glysofor TERRA</i>	<i>Antifreeze protection</i>
20%	-9
30%	-16
40%	-25
50%	-38
58%	-51

Safety temperature: _____

Min. concentration: _____

Total quantity of the solution: _____

Required amount of concentrate: _____
